

Custom Title Font Guide — Elidoras Codex

Yes — Orbitron is available in Canva and should be selected for **Alternate Headings**. For your **Title One** style (a custom title font), here are two practical paths:

Option 1: Create Title One Inside Canva

1. Choose Orbitron Bold or Cinzel Decorative as your base.
 2. Add **letter spacing + tracking adjustments** (try 5–10% wider) to give a cosmic feel.
 3. Apply Canva's built-in **Glow effect** with your palette (Teal, Purple, or Gold). Keep blur low, transparency ~30%, size medium.
 4. Save this text element as a reusable **Brand Template** so it acts like your “Title One.”
-

Option 2: Upload a Custom Font

1. If you want a unique, unreleased font (like a runic or techno-gothic style), you can **download a font file (OTF/TTF)**.
 2. Upload via **Brand Kit → Fonts → Upload a Font**.
 3. Set that uploaded font as **Title One**. Canva will then keep it consistent across all projects.
-

Title One Styling Rules

- Size: 72–120 pt for posters, 48–72 pt for slides.
 - Color: Cyber Gold (#F5C542) primary; Teal or Purple as alternates.
 - Effects: Subtle outer glow in palette colors; never use heavy shadows.
 - Usage: Only for cosmic headers, posters, or lore titles.
-

👉 Recommendation: Start with **Orbitron Bold + Glow** as Title One in Canva. Later, if you want a custom rune-tech font, upload it and replace Orbitron while keeping the same styling rules.
